MAKARAND PASHILKAR

Software Developer
makpashilkar@gmail.com | +91-8779858628 | Thane | Portfolio | https://www.linkedin.com/in/makarand-pashilkar/

Summary

Software development professional hands-on experience developing, maintaining, deploying and enhancing web applications. Skilled in JavaScript, React.js, Next.js, REST API integration, database connectivity, and web application deployment. Experience maintaining a live e-commerce platform supporting customer orders and developing a food-ordering application with customer-facing features, admin dashboards, and order management workflows. Familiar with Agile development, application troubleshooting, technical documentation, and AI-assisted software development.

Experience

Freelance | Madhura Puranpoli Feb 2026 – Present
Web Developer and Digital Marketing

- Technologies: Next.js, React, TypeScript, NestJS, AWS Lambda, DynamoDB
- E-commerce Ordering Platform
- Build, maintained and enhance a live e-commerce storefront, implementing website updates and feature improvements to support customer ordering and business requirements.
- Built customer-facing storefront and ordering workflow improvements based on business requirements.
- Led and created AI-assisted social media content and promotional videos, edited marketing creatives, and supported digital marketing initiatives to increase online visibility and drive customer orders for Madhura Puranpoli.
- Live website: madhurapuranpoli.store

Infosys Dec 2021 – May 2024
Systems Engineer

- Collaborated with development and business teams to understand application requirements and document functional workflows
- Supported release coordination across 70+ microservices by tracking version upgrades, reviewing build/test results, and documenting issues and resolutions
- Participated in Agile ceremonies; used GitLab merge-request workflows and maintained project documentation in Jira and Confluence
- Performed API response validation using Postman and co-ordinated with developers and testers to investigate Ul and integration issues

Education

Lokmanya Tilak College of Engineering Bachelor of Engineering
Computer Engineering Navi Mumbai, Maharashtra, India • 2018 – 2021

Projects

Good Boy Grub — Online Food Ordering Platform Aug 2026 – Present

- Developing an online food-ordering application for a local food business.
- Designed, built and worked on product browsing, cart, checkout, and order-placement flows for customers, plus a kitchen display system (KDS) for viewing and managing incoming orders for admin.
- Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Resend, Vercel, Git, GitHub.
