MAKARAND PASHILKAR

Software Developer
makpashilkar@gmail.com | +91-8779858628 | Thane | Portfolio | https://www.linkedin.com/in/makarand-pashilkar/

Summary

Software Developer with 2.5 years of experience at Infosys and hands-on experience building and deploying web applications. Skilled in React, JavaScript, TypeScript, REST APIs, and application troubleshooting, with projects involving full-stack development and Retrieval-Augmented Generation (RAG). Seeking junior full-stack or AI application development roles.

Experience

Freelance | Madhura Puranpoli Feb 2026 – Present
Full Stack Developer and Digital Marketing

- Developed and enhanced an e-commerce ordering platform with product browsing, cart, checkout, and customer order-placement workflows.
- Implemented Supabase integrations for order management, supporting order processing, pricing, and delivery-fee calculations.
- Created AI-assisted social media content and promotional videos to support the business's online presence.
- **Technologies used:** Next.js, React, REST APIs, TypeScript, Supabase, PostgreSQL, Git, GitHub.

Infosys Dec 2021 – May 2024
Systems Engineer

- Coordinated release activities and version updates across 70+ microservices, maintaining change tracking through GitLab.
- Performed API testing and request/response validation using Postman and JSON.
- Investigated application defects and collaborated with development and testing teams to troubleshoot UI and integration issues.
- Supported Agile workflows, merge requests, issue tracking, and technical documentation using GitLab, Jira, and Confluence.

Education

Lokmanya Tilak College of Engineering Bachelor of Engineering
Computer Engineering Navi Mumbai, Maharashtra, India • 2018 – 2021

Projects

Good Boy Grub — Online Food Ordering Platform Aug 2026 – Present

- Developed a full-stack food-ordering application with product browsing, cart, checkout, and order-placement workflows.
- Implemented an admin Kitchen Display System (KDS) to view and manage incoming orders.
- **Tech Stack:** Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Resend, Vercel, Git, GitHub.

RuleBeacon — CATAN Rules Assistant Oct 2026

- Built a Retrieval-Augmented Generation (RAG) application that extracts and chunks PDF content, retrieves relevant passages using Gemini embeddings and ChromaDB, and generates context-grounded answers.
- Implemented a Streamlit chat interface with PDF page citations to help users verify answers against the source rules.
- Tech Stack: *Python, LangChain, Gemini API, ChromaDB, Streamlit*

https://rulebeacon.streamlit.app/

Panna — Social Media Carousel Creator Apr 2026

- Developed a browser-based editor for creating and customizing social media carousels with live previews.
- Implemented client-side export functionality for downloading carousel slides as packaged files.
- Tech stack: React, JavaScript, Vite, HTML, CSS, html2canvas, JSZip, PWA
